OBJECTIVE

To learn and function effectively in an organization and be able to deliver to the bottom-line. To constantly upgrade my knowledge and skills and make a difference in whatever I do.

SUMMARY

Strong in coding and integration with intuitive problem-solving skills. Proficient in C-programming, JAVA, Data Structures, Algorithms, JavaScript, SQL. Passionate about implementing and launching new challenging projects. Able to translate business requirements into technical solutions.

I am someone who never gives up, who continuously tries his best to solve problems. Also, I have an energetic, enthusiastic, and people-driven communication style. Proven ability to learn new technologies faster and apply as appropriate.

Apart from technical stuff, I am an avid mobile photographer, travel freak and foody.

WORK EXPERIENCE

F5 Networks | Software Engineer-1

June 10th, 2019 – Present

Role description: My role is to work along with the Agile scrum team, in **feature development/enhancements** and providing **bug fixes** for one of the **core products of F5**, i.e., **BIG-IP**, a product suite that provides accelerated data delivery (includes web acceleration and load balancing).

- The major technical concentration is on **WEB layer (REST API and the GUI)** of the product and the technologies used are **Java, JSP, JavaScript** in **Linux** environment and **Perforce** as version control tool.
- Responsibilities include interaction with PO and the customers for understanding the requirements and the roadmap of product releases.
- Part of goEducate team, a Corporate Social Responsibility (**CSR**) initiative, to teach WEB Development to the students from an NGO on alternate weekends.

Achievements:

- Have been nominated for BeF5 award for excellent work and exhibiting F5's core values, help each others thrive and creating clarity and alignment to new joiners.
- Received multiple shout-outs from colleagues in and across the teams, in recognition of helping/guiding them to resolve the issues faster.
- Have been consistently meeting 100% of the goals set for each quarter.
- Resolved multiple critical vulnerabilities and security exposures present in the product UI.

Gamenous Private Limited | Software Developer Intern

November 27th, 2018 – May 3rd, 2019

Role description: Worked as a **MEAN stack developer** for a fantasy cricket **Progressive Web Application, MyPL**, and contributed in design and development of UI for client application (using **Ionic Framework**) and admin portal (using **Angular**) and involved in development of API in **NodeJS**.

- Source code maintenance in **git**.
- Close interaction with the executive team and the clients to understand the requirements.

Metdine Online Services Pvt Ltd | Software Development Engineering Intern

December 7th, 2017 – April 30th, 2018

Role description: My role was to **develop back-end web services** using **REST API** in **Java** using Jersey framework (JAX-RS Implementation) for android application

- **Host** and **maintain** the API services in **AWS server**
- **Design** and maintenance of **MySQL database** normalised up to **third normal form**.
- **Assist** the executive team in **project development** and **management**.

SKILLS

EDUCATION

JNTUH College of Engineering Hyderabad Computer Science and Engineering

July 2015 – April 2019

- Scored **8.47 GPA out of 10** in academics.
- Apart from academics, I've actively participated in department wise sports and represented as a **member of CSE volleyball team**.
- I was the **lead organizer** for **Hackathon on Data Science using Python** in JNTUHCEH as part of CSE department fest, **Quest**, along with many other technical events.
- One of the **top 15** teams in **Hackathon** conducted by **J-Hub in association with Idealabs**.

PERSONAL PROJECTS

1. Web Resume (Portfolio)

Description: This describes my creative, technical skills, educational background and work experience.

Languages Used: HTML, CSS & JavaScript

Live link: <https://saiphani1998.github.io/portfolio/>

2. Pacman Game

Description: This website was designed and developed to host as event website at the time hackathon organized at JNTUHCEH as part of Quest.

Languages Used: HTML, CSS & Bootstrap Framework

Live link: <https://saiphani1998.github.io/pacman/>

3. Hackathon Event Website

Description: This website was designed and developed to host as event website at the time hackathon organized at JNTUHCEH as part of Quest.

Languages Used: HTML, CSS & Bootstrap Framework

Live link: <https://saiphani1998.github.io/hackathon2k18/>

4. Start-up portfolio

Description: This website was designed and developed to host the details of the upcoming start-up that provides laundry services.

Languages Used: HTML, CSS, Bootstrap Framework & JavaScript

Live link: <https://saiphani1998.github.io/SpotLessServices/>
